

Simple SPV Signal Rules Resources

1. Patience is key. When a signal is provided, it is important not to chase the trade if half an hour has already passed.
2. We offer swing and intraday signals to cater to different trading styles.
3. For regular trades, our stop losses typically range from 20 to 30 pips.
4. News signals have a tighter stop loss of 15 to 20 pips to account for increased volatility.
5. Establish a daily profit target to maintain emotional discipline and avoid being distracted by market swings.
6. Take profit at multiple positions, locking in gains at 30 pips per position.
7. News trades require promptness. Enter the trade 3 to 5 minutes before the news release, and we will provide timely signals. Stay updated on upcoming news events at <https://www.forexfactory.com/calendar?week=this>.
8. High-risk trades offer potentially higher rewards but come with greater stop loss levels exceeding 30 pips.
9. Feel free to seek confirmation on any trading opportunity you spot in any currency pair. I will provide a confirmation for your trade idea.
10. Each signal provided carries a high potential for success. Treat them equally when determining lot size and position.
11. If you have been removed from the group, it means your subscription has expired. Simply re-subscribe to regain access to the signals.

By adhering to these signal rules, you can trade with discipline, manage risk effectively, and maximize your profit potential in the forex market.
